

AquaMax-E

Professional Electric Pressure Washers

www.graco.com

AQUAMAX-E ADVANTAGES

- Fully loaded with all accessories so it's ready to be taken on any job
- With automatic on/off switch, engine only runs on demand
- Durable motor, 1450 RPM. Provides the life professionals demand.

Professional Cleaning Applications

AQUAMAX-E 2330 – AQUAMAX-E 2335 - AQUAMAX-E 3050

AquaMax-E

Professional cleaning power in a compact size

In addition to our gas range of the AquaMax™ Pressure Washers and the Hot Water version for Heavy Duty Cleaning, Graco® also offers a range of Electric Pressure Washers:

AQUAMAX-E

We propose to offer professional cleaning performance, fully loaded with all needed accessories and priced to attract your attention.

We start our range with the most output that a 240 V electric engine can provide. We complete our professional cleaning solution with 400 V power cleaners.

In short, it's a dirty world out there. The AquaMax-E from Graco is the perfect solution to clean wherever there is livestock and/or wherever the sound of a gas engine is not welcome.

AquaMax-E 2330

AquaMax-E 2335

AquaMax-E 3050

Ergonomical Spray Gun
- With soft grip
- Unique QuikDisconnect™ coupling to connect accessories to the gun.

Smart Pressure Adjustment at the Gun at 400 V

Delivered standard with 2 Lances:

- 90 cm angled lance + Flat tip:**
- for floors, ceilings and general cleaning
- 50 cm short lance + RotoBlast™ tip:**
- for wall cleaning where space is tight like on scaffolding

RotoBlast™ Tip

On-board Chemical Tank, 4.1 liter with Cap

Carry the chemical with your AquaMax-E. It just slides onto it. Have a few spare extra tanks with you so you always have the right cleaning product ready to be mounted onto your machine.

Materials & Applications

Both the AquaMax-E 2330 and AquaMax-E 2335 are the ideal solution for tradesmen, painters and mid-sized building firms that usually work on small industrial sites.

The AquaMax-E 3050 is the perfect choice for building contractors, mid-sized farms and garages. It offers higher pressure flow, cleaning efficiency and a longer life pump and frame design for more intense applications.

Hose Reel (AquaMax-E 3050 has a hose guide)

- 15 m DN6 hose, extendable up to 30 meters.
- Get ready to work faster and go back home sooner. Fight the dirt, not your hose.

Chemical Adjustment Knob

from 0 to 5 % to control your mix

Automatic Start/Stop

AquaMax-E only runs when you trigger the gun. Provides quiet operation while saving the life of the components.

Pressure Indicator Gauge

Pressure Regulation

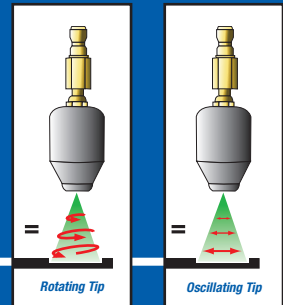

GOOD TO KNOW

ROTATING AND OSCILLATING TIPS

Rotating and oscillating tips *increase your cleaning power and decrease your cleaning time.* They offer 0° spray impact with 25° coverage. Tips include a filter with quick connection and offer heavy-duty components for long life and reliability. Can be used on pavements, driveways, vehicle tracks, muddy areas, old peeling paints and concrete surfaces.

! TIP

CHEMICAL INJECTOR

The chemical injector kit sucks the chemical component from a bucket and mixes it with the water flow. To apply detergent for misting and rinsing, we advise to use the special (black) low pressure tip.

AquaMax-E 3050 - a different kind of experience

The smart pressure adjustment is exclusive to the AquaMax-E 3050. It allows you to change the working pressure of the unit at the gun without interrupting your cleaning activity. It saves money by adjusting water consumption in relation to the pollution of the surface to clean.

The AquaMax-E 3050 also offers an additional hose guide to the hose reel.
